2014

SLIDEHEROES

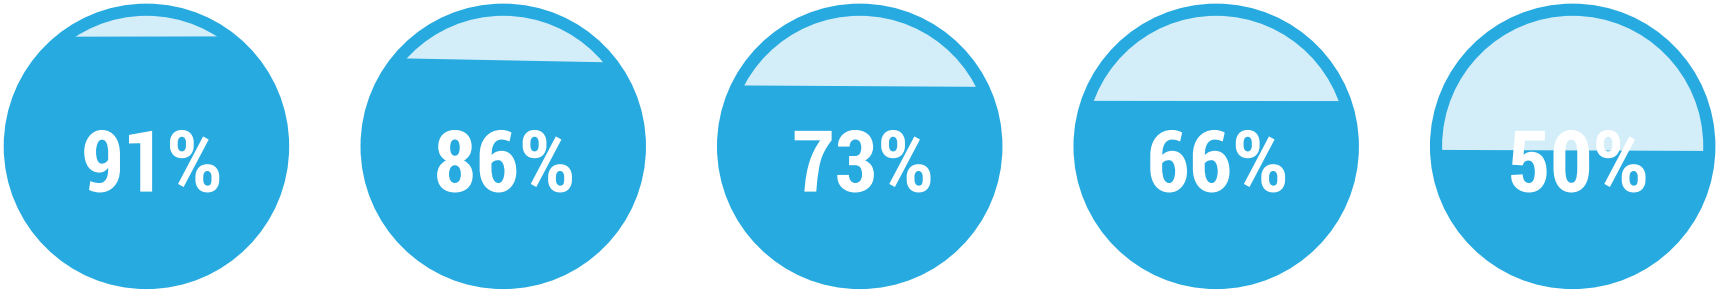
CHOOSING THE RIGHT DISPLAY OF DATA

95%

of consumers use search to find information on the web

CHOOSING THE RIGHT DISPLAY OF DATA

CONSUMERS VALUE SEARCH: 91% use search to find information on the web



Found what they were looking for

Learned something new or important

Believed information was accurate and trustworthy

Said search engines are fair and unbiased

Found info they didn't think they could

USING TABLES CRITERIA

LOOK-UP

Look-up individual values

COMPARE

Compare individual values (but not entire series of values)

PRESENT PRECISE VALUES

Present precise values

SUMMARY & DETAIL

Present both summary and detail values

Lots of master slides for any layout you need

[2] 6 months into offer at $19.99/month

LESSON SUMMARY

DETERMINE HOW DATA WILL BE USED

To select between a graph or table, first determine how the information will be used

USE TABLES TO FOCUS ON INDIVIDUAL VALUES

Use tables to look up and compare individual values; Present precise values and summary and detail values

USE GRAPHS TO SHOW SHAPE OF DATA

Use graphs when story is contained in the shape of the data or when the display will be used to reveal relationships
